Files copied to harddrive (excluding delivery)	£125
Additional geometry & colour calibrations from source files (per version)	£300

TECHNICAL GUIDE

Film recordings will be made to maximise image size on 35mm full frame. If you require recording to a reduced patch size (e.g. to replicate Super16 or Super8 grain size) please specify this in the notes section of the Cinelab Film & Digital Check List.

Film scans will be at standard frame 2048 x 1556 (2K) or 4096 x 3112 (4K).

File delivery format needs to be 10bit DPX or TIF and Log, Rec709 or P3 colour space.

Please supply a single, continuous file sequence - with maximum of 7 digit number sequence at end of file name. E.g. 'promoname.#####.dpx'

Please email sales@cinelab.co.uk if you have any questions or you can call us on **0044 1753 501500**. We are here to help!
